

# Radiation Safety Release Form

## Radiation Safety Release Instructions

Case# \_\_\_\_\_ Client's Name \_\_\_\_\_

Your pet has been treated with a therapeutic dose of I-131 radioactive iodine and is now ready to return home. Your pet poses no health risk to you or your family provided you follow the safety precautions below.

In order to insure compliance with state and federal regulations the following safety precautions should be adhered to for the next 14 days.

After reading these instructions please sign below.

1. Your cat should be kept indoors.
2. Disposable gloves, which we have provided, should be worn when cleaning the litter box.
3. Your cat should be isolated from children under the age of 12, and pregnant women.
4. Your cat should not be permitted to sleep with family members, or to sit in a chair with them.

Should you have any questions or concerns after discharge please do not hesitate to contact Dr. Smith or Margaret at the hospital at 321-752-7600.

I, the undersigned owner/agent, have read the above information and in signing this form acknowledge that my cat has been treated with radioactive iodine, and I agree to comply with the discharge instructions.
